Dashboard Title: Netflix Content Insights Dashboard

Purpose

This interactive Tableau dashboard visualizes key trends in Netflix's content library across various dimensions including genre, country, release year, rating, and content type.

Designed for exploration and content discovery, it helps users and analysts identify popular genres, growth patterns, and regional content distribution through interactive filtering and visual storytelling.

Business Value & Insights

- Identifies top-performing genres like Dramas and Documentaries across the global catalog.
- Analyzes content growth trends with peak additions between 2015 and 2018.
- Reveals regional content strengths, especially in the U.S. and India.
- Highlights content type split showing ~70% Movies and ~30% TV Shows.
- Maps rating-based content distribution to support demographic targeting strategies.
- Enables strategic content decisions on licensing, production, and regional expansion.

Key Performance Indicators (KPIs)

- Total Movies & TV Shows by Year
- Content Ratings Distribution (TV-MA, TV-14, TV-PG, etc.)
- Top 10 Genres by Volume
- Country-wise Content Availability
- Movies vs TV Show Ratio

Charts and Visualizations

- Bar Chart: Top 10 Genres based on content count.
- Map Chart: Global content distribution by country.
- Area Chart: Movies & TV Shows added by year.
- Donut Chart: Movies vs TV Show proportion.
- Bar Chart: Content categorized by Rating.
